Question	Eric Thurman	Jacqueline Malinauskas	Bill Zak	Carol A. Jones
2. How could the water & sewer district be improved? Please provide your top 2-3 ideas.	Declined to Respond	Improved by studying the comprehensive plan of development for the county. Aligning water & sewer with goals for development so systems are not over used and the needs of additional developments adequately met allowing existing usage to remain intact and function well.	Declined to Respond	Declined to Respond
3. Do you believe that water & sewer districts have a role to play in area growth? Why do you believe this?	Declined to Respond	Most definitely. Water and sewer (along with power, roads and infra-structure) should be high priority when considering growth.	Declined to Respond	Declined to Respond
4. Should septic systems on individual properties be required to be brought up to current code levels if that system fails? Why or why not?	Declined to Respond	Periodical testing (say every 5 to 7 years) or verification at the sale of a property would be helpful to insure septic systems on individual properties meet standards.	Declined to Respond	Declined to Respond
5. What role should water & sewer districts have in the design and authorization of new developments?	Declined to Respond	Huge Role. New developments should be required to have adequate water & sewer for all development and growth goals.	Declined to Respond	Declined to Respond
6. Do you believe access to city managed water and sewer should be increased to rural communities and why?	Declined to Respond	If close by and readily available YES. Everyone should have clean water and proper sewer services. But to mandate this and require everyone to individually pay for and acquire it, may be a different matter.	Declined to Respond	Declined to Respond
7. Water & sewer districts have the reputation of rubber-stamping new developments. What do you believe the proper process should be to include the existing residents (impact area) concerns?	Declined to Respond	No rubber stamps. New developments should be carefully studied so proposed systems are adequate for current goals and provisions for expansion if the need arises.	Declined to Respond	Declined to Respond
8. What recommendations do you have to improve delivery of water in the water & sewer district?	Declined to Respond	More wells? Adequate pumping (generators?) when the power goes off.	Declined to Respond	Declined to Respond
9. What should be the role of the water & sewer district be in working with local governing authorities (county commissioners, city planners, etc.) and why?	Declined to Respond	Should be consulted and recommendations taken seriously to provide for current usage as well as proposed needs.	Declined to Respond	Declined to Respond
10. What is your background and why do you feel it qualifies you for this position?	Declined to Respond	Homeowner, CEO Business owner, Resident of this community for over 40 years. Owner of rental properties. MS degree Univ. of Idaho.	Declined to Respond	Declined to Respond
